Task#1:-

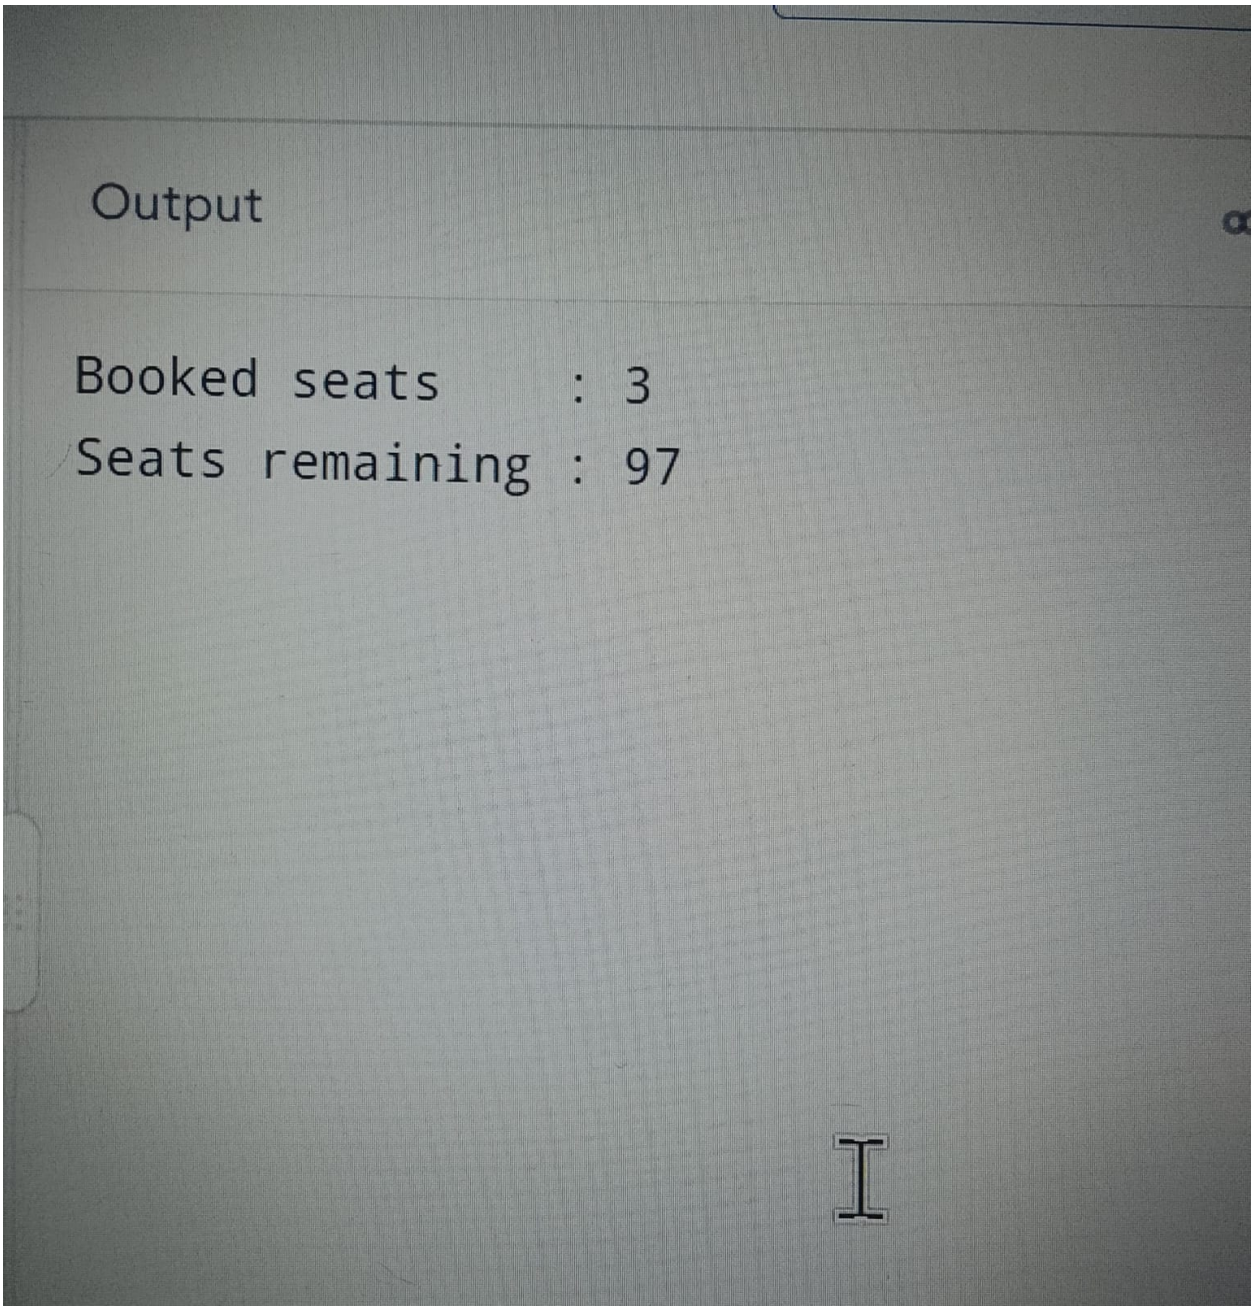

Edit with WPS Office

```
19      }
20
21      public void showStatus() {
22          System.out.println("Booked seats    : " + bookedSeats);
23          System.out.println("Seats remaining : " + (capacity - bookedSeats));
24      }
25
26      public static void main(String[] args) {
27          CinemaHall hall = new CinemaHall();
28
29          for (int i = 0; i < 5; i++) {
30              hall.bookSeat();
31          }
32
33          for (int i = 0; i < 2; i++) {
34              hall.cancelBooking();
35          }
```

Task#3:-

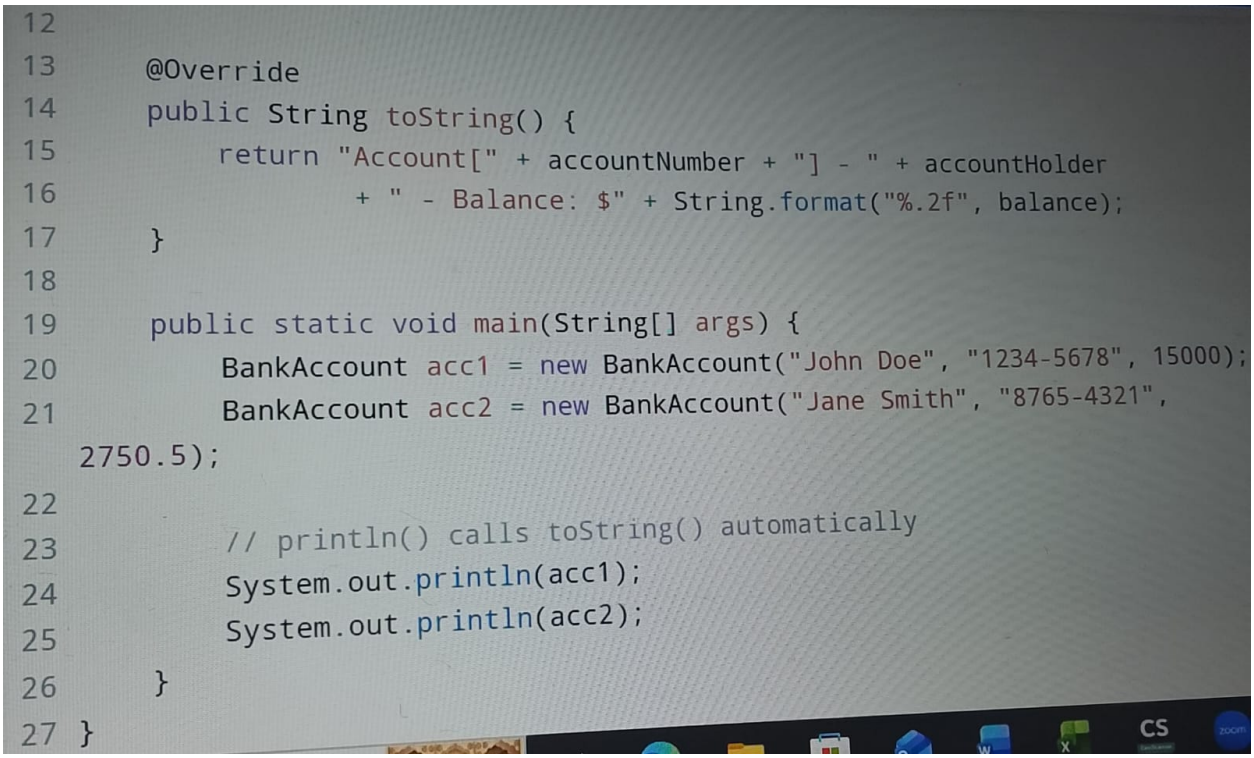

```java
public class BankAccount {

    private String accountHolder;
    private String accountNumber;
    private double balance;

    public BankAccount(String accountHolder, String accountNumber, double
balance) {
        this.accountHolder = accountHolder;
        this.accountNumber = accountNumber;
        this.balance = balance;
    }

    @Override
    public String toString() {
        return "Account[" + accountNumber + "] - " + accountHolder
                + " - Balance: $" + String.format("%.2f", balance);
```
