

Object Oriented Program

Lab report 11(Registration Form using Net beans GUI Builder)

Submitted to: Mam Nayab Khalid

Submitted by: Zeenat Fayyaz

Sap I'd:78482

1.Objective:

To design and develop a Registration Form in Java using the NetBeans GUI Builder, applying JFrame, JLabel, JTextField, JPasswordField, JButton, colours, and event handling.

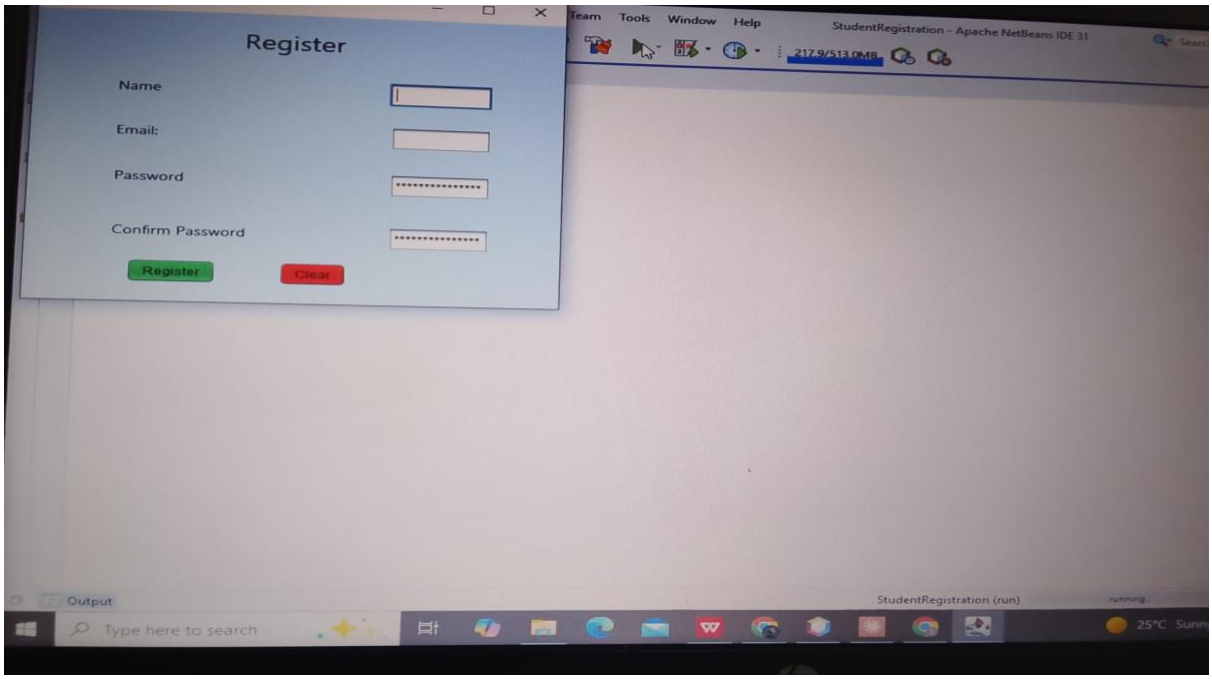

2. Tools Used

- *Apache NetBeans IDE 31*
- *Java Swing (GUI Builder)*
- *Project name: StudentRegistration*
- *Class name: RegistrationForm*

3.Components Used

Components	**Variable Name**
JFrame	Registration Form
JLabel	JLable1 to LJable5
JTextFeild	txtName, txtEmail
JpasswoedFeild	txtPassword, txtConfrim
JButton	BT register, btnClear

4. Design View

Source Code

Background and colour of the NeatBeans (inside the Constructor);

```
Public RegistrationForm() {
   initComponents();
   getContentPane().setBackground(new java.awt.Color(230, 240, 255));
}
```

Registration button events:

```
Private void btnRegisterActionPerformed(java.awt.event.ActionEvent evt) {
   String name = txtName.getText().trim();
   String email = txtEmail.getText().trim();
   String pass = new String(txtPassword.getPassword());
   String confirm = new String(txtConfirm.getPassword());
   If (name.isEmpty() || email.isEmpty() || pass.isEmpty()) {
      Javax.swing.JOptionPane.showMessageDialog(this, “Please fill all fields”);
   } else if (!email. Contains(“@”)) {
      Javax.swing.JOptionPane.showMessageDialog(this, “Enter a valid email”);
   } else if (!pass.equals(confirm)) {
      Javax.swing.JOptionPane.showMessageDialog(this, “Passwords do not match”);
   } else {
      Javax.swing.JOptionPane.showMessageDialog(this, “Registration successful!”);
   }
}
```

Clear button events:

Private void btnClearActionPerformed(java.awt.event.ActionEvent evt) {

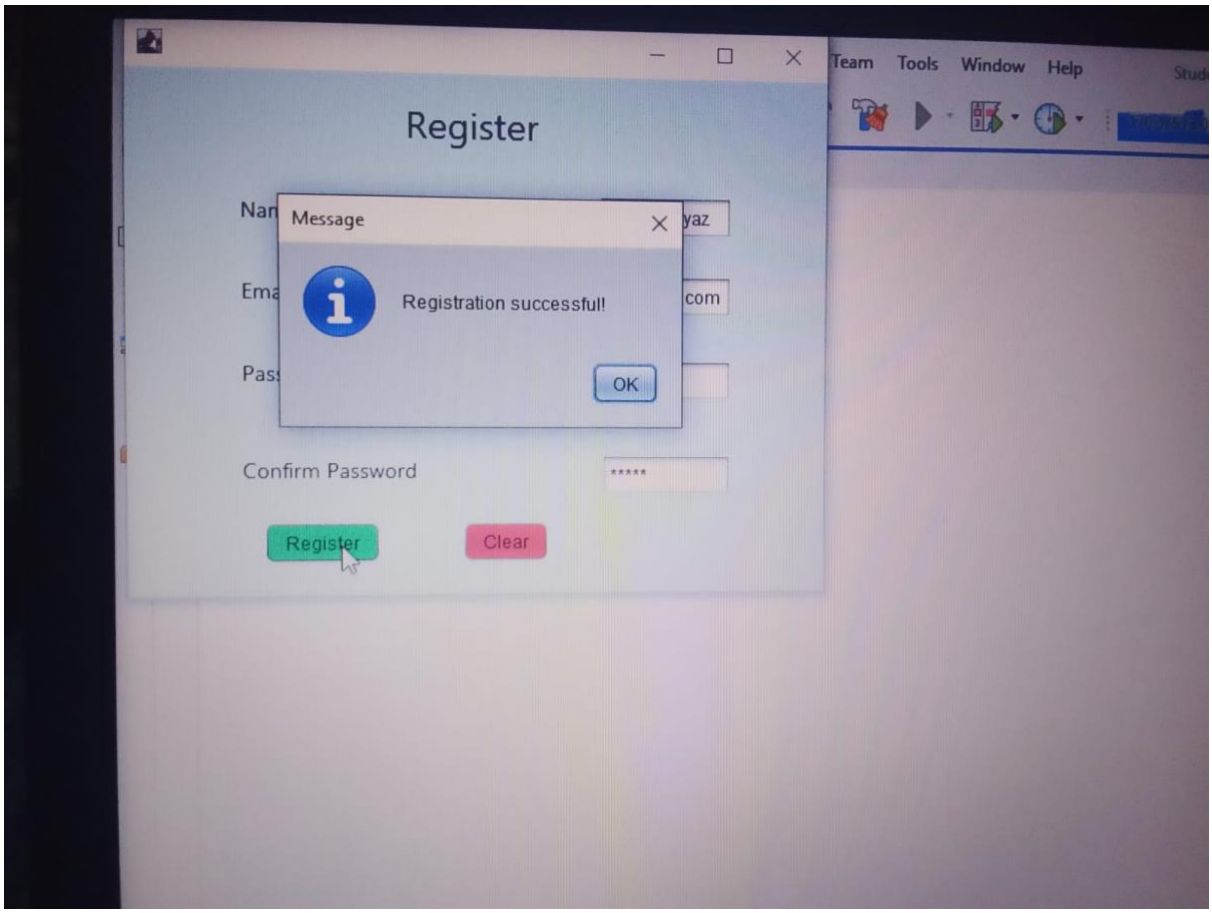

txtName.getText(“”);

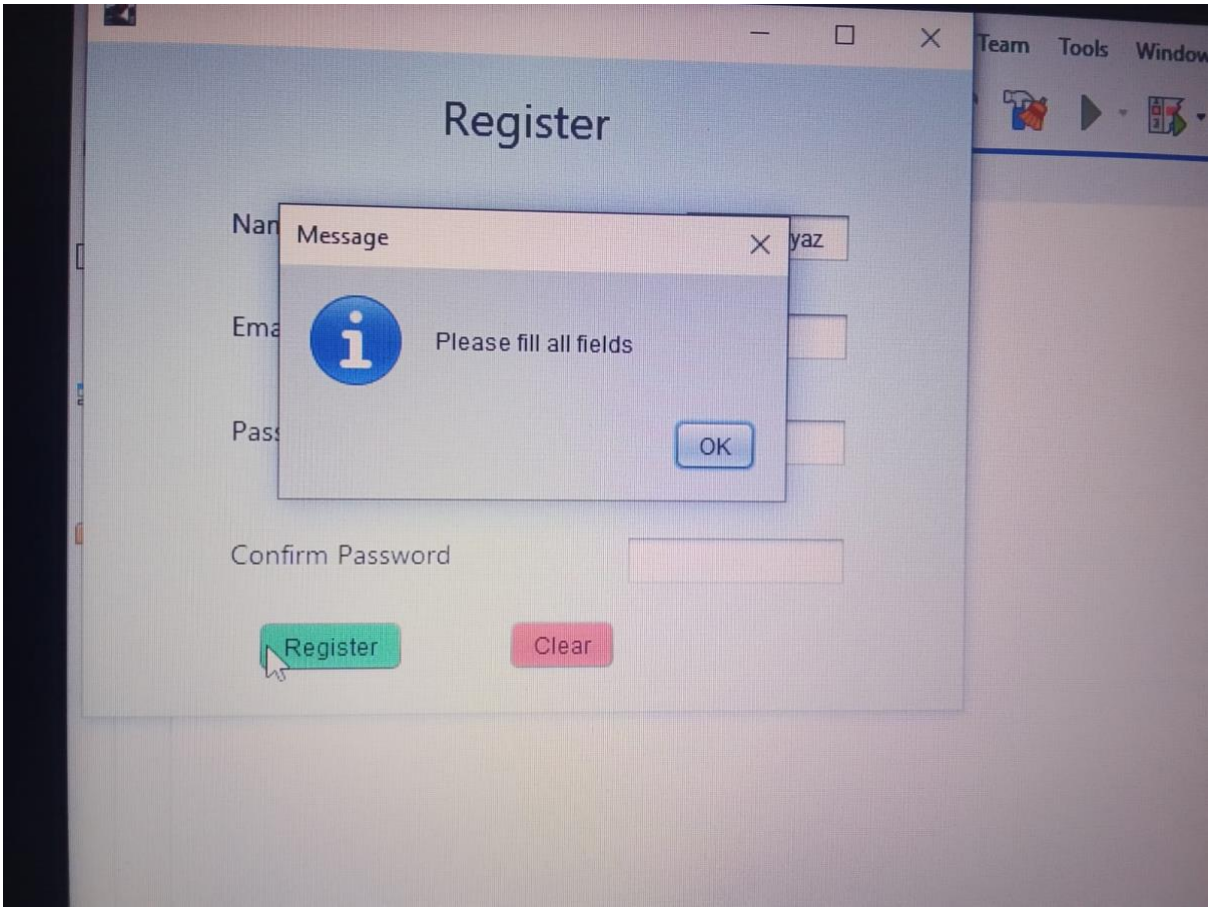

txtEmail.setText(“”);

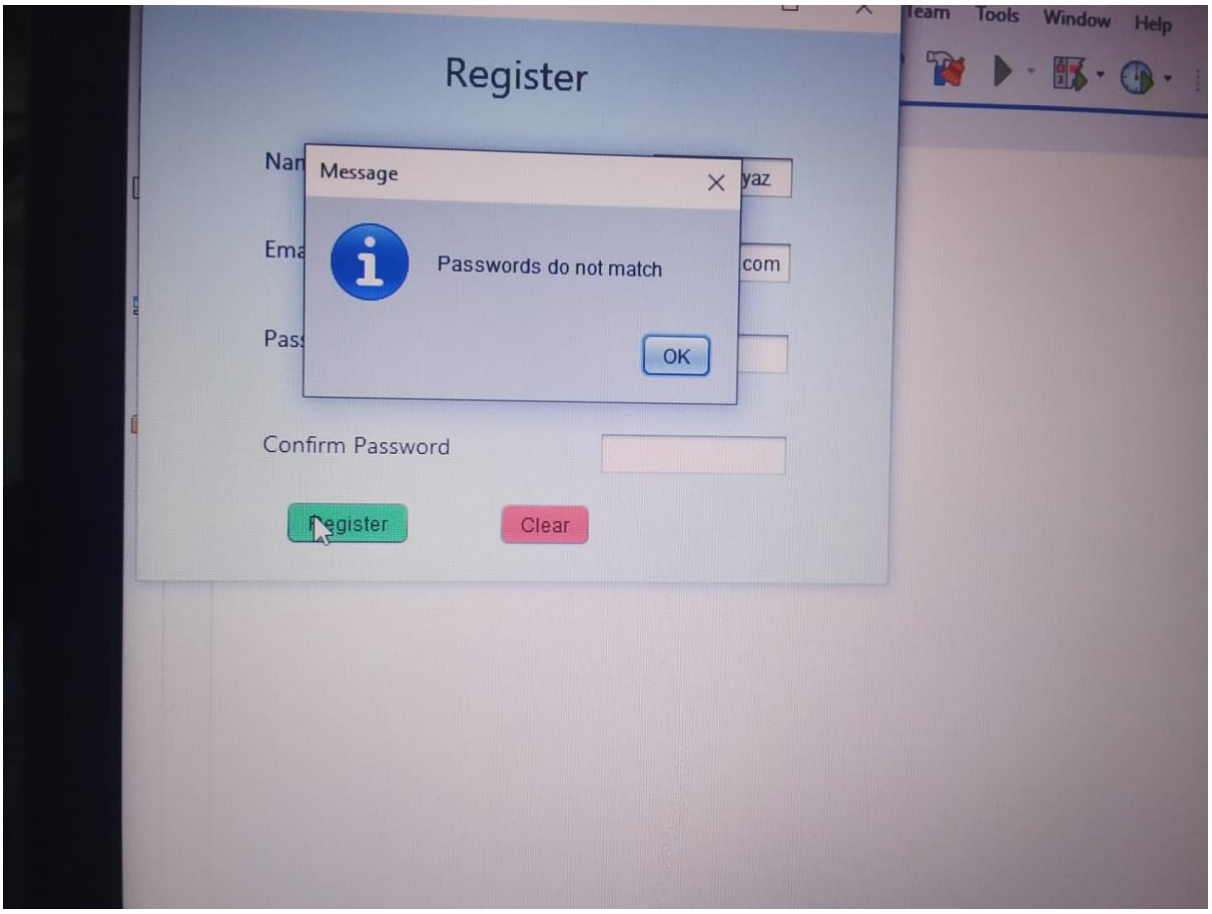

txtPassword.setText(“”);

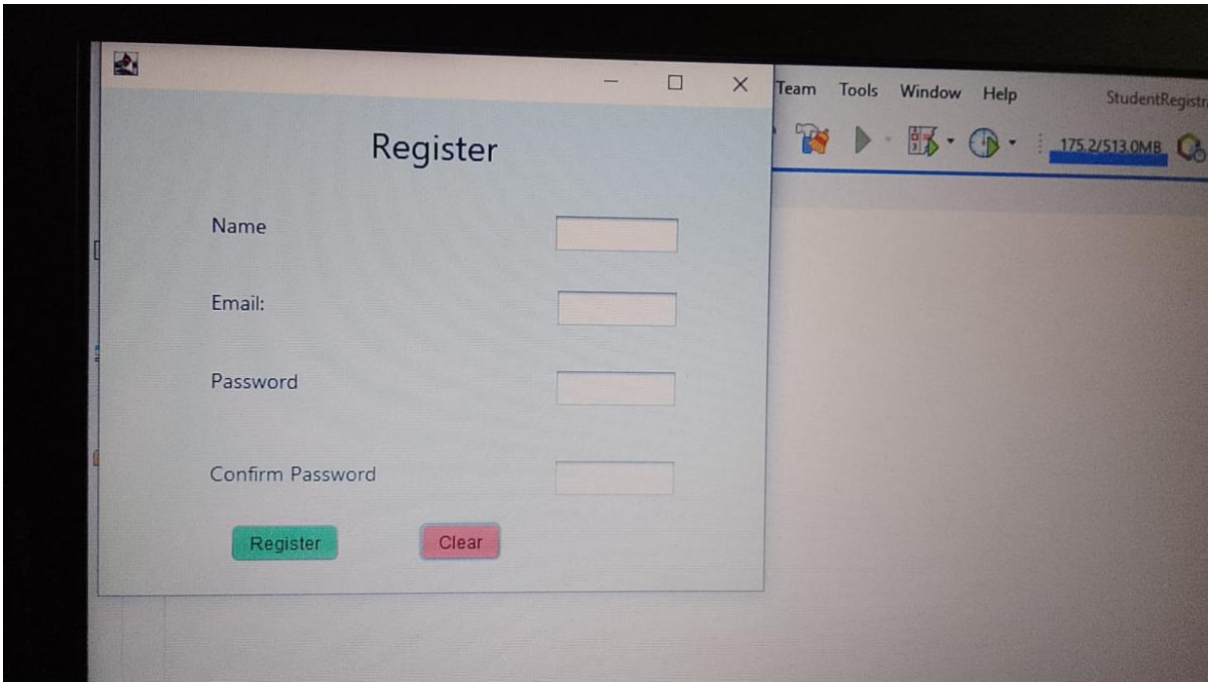

txtConfirm.setText(“”);

Output:
